Best Choice in Business Security

Hills Reliance

The Hills Reliance security system features advanced technology to safeguard your staff, property and assets. It has extraordinary power and is simple to use. Hills Reliance is ideal for commercial applications and is expandable to meet the demands of growing businesses.

Hills Reliance – Keeping your business safe and protected.

Flexible, Customised Security

Hills Reliance offers superior customisation to suit even the most complex of installations. Hundreds of different programmable options allow your security installer to customise your new security system to meet your requirements.

Up to 99 user PIN codes may be created with a variety of authority levels. The allocation and authority of these PIN codes can be controlled by a designated master user(s) or handled via individual department managers.

Authority levels:
• Give users access only between selected times
• Control the areas that can be accessed by a staff member
• Provide selected users with the ability to create, modify or delete other user PIN codes

Best Protec

Perfect for Business

Commercial, Retail, Warehousing and Industrial

If an intrusion attempt is detected when the system is "Armed", a loud siren will sound to deter the intruder and draw attention to the situation. In the event of an emergency, a signal can be reported to a 24hr alarm monitoring centre. The monitoring centre can then respond with the appropriate service such as phoning you or sending a patrol guard to investigate.
Expandable to 128 security sensors, 99 users, 8 areas, 24 code pads and 4 proximity keyless entry readers the Hills Reliance caters for small to large businesses and can be tailored to your individual requirements.

Automatic Protection

Automatic System Arming and Disarming ensures your business is protected even if you forget to turn it on. Now that's smart!

Keyless Entry

Adding proximity readers gives you the benefit of staff control and provides keyless entry to individual areas within your business.

Chime Feature

A ding-dong sound can be made if someone enters a particular area, perfect for alerting you of visitors and new customers.

Touch Nav

Hills Reliance TouchNav is an intuitive graphical touch screen interface for users of the Hills Reliance security system. Offering simple fingertip control of the security system with a clear 3.5" touch screen with easy to understand graphics.

It can be customized for each location when it is installed. This includes custom naming of zones, areas, users and output names. Users can even leave messages for other users via the internal message centre. With the Hills Reliance TouchNav, security is just a touch away.
